

Akhila G A

SRE — DevOps Engineer — Cloud Engineer

akhila.ga.job@gmail.com | +91-9074835074 | www.linkedin.com/in/akhila-g-a-462b5418b

PROFILE

- DevOps/Site Reliability Engineer with over 3 plus years of experience supporting application teams across infrastructure, cloud operations, change and incident management ensuring scalable, secure and highly available systems.
- Proficient in building and managing cloud-native environments using infrastructure-as-code, automating deployments via CI/CD pipelines and implementing robust monitoring, alerting, and access control practices.
- Actively collaborate with cross-functional teams as part of run/support operations, ensuring reliability, scalability, and uptime for enterprise scale, globally used real-time applications.

EXPERIENCE

Systems Engineer

Dec 2021 - Present

Tata Consultancy Services

Kochi, Kerala

- Member of the global SRE team managing infrastructure for 16+ enterprise applications across 23+ AWS accounts for Avis Budget Group. Responsible for end-to-end reliability, CI/CD systems, and platform infrastructure.
- Administer 1500+ virtual machines, Terraform-based IaC, and DevOps tools spanning Bitbucket, Jenkins, ArgoCD, and CodeCommit, ensuring seamless operations across multiple architectures (ECS, EKS and CI/CD pipelines).
- Manage and renew 500+ SSL certificates across AWS (Server, ALB, NLB, and CloudFront) while coordinating monthly patching, AMI upgrades, and security updates across multi-account environments to ensure compliance.
- Primary point of contact for deployment support, pipeline failures, and P1 incidents, coordinating across application, platform, and networking teams to troubleshoot issues, restore services, and ensure smooth production releases.
- Collaborated with application teams to build observability dashboards across multiple applications using CloudWatch, Splunk, Dynatrace and Grafana, and handled incident response for alerts escalated by L1 teams.
- Partnered with FinOps team and on boarded Sedai to implement AI-driven cost anomaly detection, drive gp2-to-gp3 storage migration, and right-size EC2/EKS workloads, achieving 20 percentage cost savings through resource optimizations
- Served as a key representative in securing the AWS Resilience Services Competency through collaboration with AWS during assessment and validation phases, and received a Service and Commitment Award in recognition of efforts.
- Acted as the Single Point of Contact (SPOC) for the transition of three applications from the build team, ensuring comprehensive collection of support-related information including infrastructure specifications, standard operating procedures (SOPs), certificate configurations, and access privileges. Delivered detailed knowledge transfer (KT) sessions to enable the entire team to effectively manage the applications

TECHNICAL SKILLS

Cloud & Infrastructure: AWS, Azure
Infrastructure as Code (IaC): Terraform

Version Control & SCM: Git, Bitbucket, CodeCommit
Ticketing & Collaboration: Jira, ServiceNow, CalloneIt, Confluence

Containerization & Orchestration: Docker, Kubernetes
CI/CD: Jenkins, ArgoCD

Monitoring & Logging: Grafana, Prometheus, Dynatrace

CERTIFICATIONS

AWS Certified Solutions Architect – Associate
AWS Certified AI Practitioner

AWS Certified Cloud Practitioner

EDUCATION

Bachelor of Science - (BS Mathematics)
Govt. College for Women

July 2015 - March 2018
Thiruvananthapuram, Kerala

Master of Science (M.Sc , Quantitative Finance)
Pondicherry University

July 2018 - March 2020
Kalapett, Puducherry
